## PROFESSIONAL SUMMARY

Computer Science graduate specializing in Artificial Intelligence and Machine Learning, with hands-on experience in building ML and NLP-based applications. Proficient in Python, Pytorch, and data preprocessing, with practical exposure through a 12-week AI-ML internship at Eduskills Foundation. Developed projects including spam detection and word translation systems, and seeking entry-level roles in AI/ML or Data Science.

## TECHNICAL SKILLS

**Programming & Querying:** Python, SQL  
**Frameworks & Libraries:** Pytorch, Scikit-learn, Pandas, Numpy, Matplotlib, Seaborn, Plotly  
**Tools & Platforms:** Google Colab, Jupyter Notebook, VS Code, OpenAI(ChatGPT), Perplexity, Streamlit, Tableau, GitHub, Power BI  
**Core Concepts:** Machine Learning (ML), Natural Language Processing (NLP), Data Preprocessing, Exploratory Data Analysis, Feature Engineering, Model Evaluation, Statistics, Linear Algebra, Calculus

## PROFESSIONAL EXPERIENCE / INTERNSHIPS

**AI-ML Virtual Intern| Edu skills** Jan 2024 - Mar 2024  
*India*

- Developed ML and NLP models using **Python Pytorch, and Scikit-learn** demonstrating strong problem-solving skills.
- Built models on datasets of up to **5,000+ records**, improving prediction accuracy
- Designed spam detection system achieving **89% accuracy** reflecting innovation and adaptability.
- Optimized model performance, reducing error rates by **10–15%** through critical thinking.
- Applied preprocessing techniques improving data quality with attention to detail

## PROJECTS

**Television Market Analysis, Price Prediction & Recommendation System| [GitHub](#)** June 2026

Python, Scikit-learn, Pandas, NumPy, Streamlit

- Built a TV price prediction model using **1,000+ television records**.
- Cleaned and preprocessed **1,000+ records** for model training.
- Evaluated **5+ regression models** using  $R^2$ , MAE, and RMSE metrics.
- Developed a **Streamlit dashboard** with prediction and analytics modules.
- Created a recommendation system for **TV comparison by price and features**.

**Email Spam/Ham Detection | [GitHub](#)** July 2025 - Aug 2025

Python, Scikit-learn, NLP, Pandas, Pytorch

- Developed LSTM-based spam detection model trained on **5,000+ email entries** applying analytical thinking.
- Achieved **89% classification accuracy** demonstrating result-oriented execution.
- Reduced false positives by **15%** showcasing strong problem-solving ability.
- Processed and cleaned **5,000+ text records**, improving data quality and model efficiency.
- Evaluated model using **3+ precision, recall, and F1-score** for better reliability

## CERTIFICATIONS & ACHIEVEMENTS

- AI-ML Virtual Internship** – Edu skills (March 2024)
- Python** – GUVI (September 2023)
- Machine Learning with Python** – IBM (August 2023)

## EDUCATION

**B.Tech in Computer Science with Artificial Intelligence** 2022 - 2025  
*Andhra Pradesh, Gates Institute of Technology, Gooty | CGPA: 7.6/10.0*  
**Final Year Project:** Artificial Intelligence Tools for Churn Prediction Model and Customer Analytics
